## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a device for the amplification of a message notification signal from a communication device, classified in class 455, subclass 567.
- II. Claim II, drawn to a power source, classified in class 455, subclass 343.1. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case **Invention I**: is a device, which alerts the user of an incoming message by amplifying the alert from the communication device; **Invention II**: is a power source for the communication device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
